

Comedkares

SSIT Tumkuru is happy to extend the opportunity for 1st & 2nd year BE students to participate in **Comedkares** latest innovative programs during the academic year 2022-23. Comedkares is establishing eight state of the art innovation Centres across Kanataka, that empower students to become problem solvers, acquire competency in emerging technologies and develop solutions that have a positive Impact on the community.

The Arena will also be a common forum for community stakeholders to walk in and interact with the students and collaboratively work on building solutions.

Comedkares will conduct structured programs at the Innovation centers to equip the students with practical experience and give them hands on exposure to advanced technologies, tools and machinery.

The Programs are designed to cater to students across their four-year engineering course, and provide additional leverage during every year. The programs at Comedkares are recognised by industry. They are fully aligned with the four-year engineering curricula of all the universities in Karnataka.

Programs offered by Comedkares

1. Rapid prototyping courses for 1st and 3rd semester
2. Social Innovation course for 2nd & 4th semester

Subsequently courses for higher semester students on emerging technologies like AR/VR, Blockchain, Fullstack, Machine learning & many more will be offered.
